

Azure ASP.NET Core

Development Mode

Hans-Petter Halvorsen

Error when Running from Azure?

- Do you get errors when running your ASP.NET Core Web App from Azure?
- If you turn on “Development Mode”, you will get a more detailed Error Message
- This should only be done during Debugging
- Turn it off when you have found the Error

Do you get this Error?

BookApp Home Books

Error.

An error occurred while processing your request.

Request ID: `1aca60ee-4a44e368d92df529`.

Development Mode

Swapping to the **Development** environment displays detailed information about the error that occurred.

The **Development environment shouldn't be enabled for deployed applications**. It can result in displaying sensitive information from exceptions to end users. For local debugging, enable the **Development** environment by setting the **ASPNETCORE_ENVIRONMENT** environment variable to **Development** and restarting the app.

Turn on Development Mode
